### The Average Sold Price per Square Footage is Neutral\*

The Average Sold Price per Square Footage is a great indicator for the direction of property values. Since Median Sold Price and Average Sold Price can be impacted by the 'mix' of high or low end properties in the market, the Average Sold Price per Square Footage is a more normalized indicator on the direction of property values. The April 2022 Average Sold Price per Square Footage of \$1392 was down **1.9%** from \$1419 last month and up **10%** from \$1265 in April of last year.

### The Days on Market Shows Neutral Trend\*

The average Days on Market (DOM) shows how many days the average property is on the market before it sells. An upward trend in DOM tends to indicate a move towards more of a Buyer's market, a downward trend indicates a move towards more of a Seller's market. The DOM for April 2022 was 16, up **77.8%** from 9 days last month and down **11.1%** from 18 days in April of last year.

### The Sold/Original List Price Ratio Remains Steady\*\*

The Sold Price vs. Original List Price reveals the average amount that sellers are agreeing to come down from their original list price. The lower the ratio is below 100% the more of a Buyer's market exists, a ratio at or above 100% indicates more of a Seller's market. This month Sold Price vs. Original List Price of 113% is down **3.4%** from last month and up from **4.6%** in April of last year.
